

## Training & Technology

# Bartragh Services acquire C4i Training & Technology

Tampa, US

Bartragh Services, LLC, a Tampa based US company has acquired C4i Consultants, Inc of Calgary, Canada and established a new company, C4i Training and Technology, Inc. The new company will still be based in Calgary. Bartragh has announced that Harry H. Thompson, III has been selected as the new company Chief Executive Officer (CEO) and Thomas E. Putt, BGen (ret'd), will be the President of the new company.

C4i Training and Technology will continue to provide its superb constructive simulation products, Military Simulation (MILSIM) and Emergency Disaster Management Simulation (EDMSIM), and outstanding customer, software and training support services to the simulation community.

Mr. Thompson, who also serves as the Vice President of Simulation Services at Bartragh, stated, *"The acquisition of a well-established simulation company like C4i with its reputation for truly outstanding constructive simulations supporting the Military and Emergency Management communities was a great fit for Bartragh."*

*The easy to use, low cost simulations of C4i will provide tremendous value-added capabilities to the other verticals of training, intelligence and aviation within Bartragh and its activities around the world."* Thompson also added that C4i is expanding its training and exercise support capabilities to address a growing requirement for a comprehensive simulation training approach with low cost simulations. *"We are excited about the future of C4i with the resources that Bartragh has brought to the company and how this will enable us to provide state-of-the art, easy to use and low cost simulations to a wide spectrum of international military and emergency management users."*

Bartragh Services, LLC is a Tampa based US company with simulation, training, intelligence and aviation capabilities providing support across the United States and internationally.

### ◆ About C4i Training and Technology:

With over a decade of simulation and software development experience, our highly skilled team of engineers and software developers have gained a reputation for creating products that prepare military leaders and emergency managers to effectively respond to complex situations. Our company and product solutions serve all levels of government and commercial organizations across defence, public safety and homeland security. [www.c4ic.com](http://www.c4ic.com)
